

# The Theory Beyond Our Universe

-Er. Sambit Kumar Moharana

(B.Tech in Metallurgical and Materials Engg., I.G.I.T, Sarang, Dhenkanal, Odisha, India)

\*\*\*

**Abstract** – This piece of writing and research comprises of a whole new concept which can describe the creation of this universe. You will find about the creation of our universe, Ancient Science Technology, Proof of who is god scientifically, the existence of Aliens between us and the origin of us. You can find about Cosmic Energy and how it created everything we know. You can find about Pandora Virus, creation of aliens in past and the ancient technology.

**Key Words:** Cosmic Energy, Multiverse, Ancient Science and Technology, Pandora Virus, Alien Hybrids.

## 1. INTRODUCTION

The world is full of wonders and mystery. One of these unsolved mysteries is the creation of this universe. Most of us know about the Big Bang Theory but who controlled this sophisticated process of the creation of this Entire universe. And what kind of energy balances this entire system. We know our life evolved on earth but who controlled this whole evolution process? What if energy can create and destroy?

We can find the answers to questions like:

- Who are we?"
- "Are we alone in this universe?"
- "Who controls us?"
- "Who formed us?"
- "Who is the creator of this universe?"
- "Who is balancing this whole universe?"
- "What is Soul?"
- "Who is GOD?"
- "How does the GOD look?"
- "Is GOD real?"
- "Who formed the GOD's we worship?"
- "Is there life after Death?"

By simply going through our past and by analyzing all the facts, scripts, carvings, structures, etc.

### 1.1 THE ANSWER

The Questions may not end but the answer is only one.

Everybody wants to know the answer but everybody got different answers.

Through these years I have gone through the past rather than expecting the future to give me the answer.

And **the answer is "COSMIC ENERGY"**

## 2. COSMIC ENERGY

Many people define the cosmic energy as energy of the space which binds the universes into one thread. It is the supreme energy from which all the energies are formed.

The fundamental principles of energy may not be applied on cosmic energy because it is beyond the space and time concept.

Because it is what that created the space and time and everything that we see and feel.

Through science we have learnt that the energy balances a system. But can it be applied to the space?

Yes, why not? Imagine the whole world, planets, solar system, universe bonded by a single thread into the multiverse. That thread is the cosmic energy which balances the whole system.

Here comes a new term "Multiverse". So, what is a Multiverse?

Multiverse is the combination of universes in a single space bonded by a certain energy i.e. Cosmic Energy.

It is not yet proved because our space explorers are not that capable of traveling such large distances. Large distances means some million light years ahead.

Thus in order to explore such distances we need more advanced technology most importantly we need a material which could withstand against the obstacles coming in the way covering this distance.

We need more advanced technology to explore the space. We have only explored 5% of this multiverse the rest 95% is still there to be explored. And we the Homo sapiens are trying our best to explore and solve the mystery.

Now let's again move to our answer "COSMIC ENERGY". Imagine the whole solar system, universe and the other universes joined by this energy.

If these all are joined by a single energy then the same energy happens to be everywhere.

The cosmic energy flows through every single thing bonded to it.

**We know that Energy can neither be created nor be destroyed but what if Energy can create and destroy?**

**What if we cannot create or destroy energy but energy can create and destroy us.**

The cosmic energy is believed to be the supreme energy which controlled the Big bang theory. It is the energy which created us and many universes like us.

If this energy flows through energy thing then it means that we all, here by saying we all I am referring to humans and the ones like us existing in other universes are connected to each other through this energy.

### 3. ALIEN DNA

It is on the way to be proved that the ALIENS also have the DNA because scientists have got a DNA sample of a small organism which came from light years ahead. That small organism managed to travel to earth on a meteorite. That small organism is a virus named as "Pandora Virus". The genome of the Pandora Virus does not match with any organism on earth but is approximately having the same structural similarities of the genome. The Pandora virus is made up of approximately 2500 genes as compared to that of the normal viruses having only 10 genes. Each about one micron—a thousandth of a millimeter—in length, the newfound genus *Pandoravirus* dwarfs other viruses, which range in size from about 50 nanometers up to 100 nanometers. A genus is a taxonomic ranking between species and family. "We have been thinking deeply into the limits of viruses, and this is why we're open more than other labs to finding exotic things—we push the envelope of what we would consider possible," said study co-author Jean-Michel Claverie, a microbiologist at Aix-Marseille University in France, who is part of a research team with microbiologist Chantal Abergel. *Pandoravirus salinus*, was found from the mouth of Chile's Tunquen River, and *Pandoravirus dulcis* from a freshwater pond near Melbourne, Australia--both of which parasitize amoebas. Perhaps most striking, 93 percent of Pandora viruses is that 2,500 genes cannot be traced back to any known lineage in nature. In other words, they are completely alien to us. The origin of the virus is still not determined the scientists are saying that this is an organism not from earth. The organism can establish a link between us and the organisms from outer world because of the gene structure. This Pandora virus has 2500 genes so it is difficult to match it with genes of any organism on earth. But scientist after analyzing similar samples said that Aliens may have DNA like humans. This one link can establish a connection between our world and theirs.

But the question who created us and them?

Is it GOD?

Who is GOD?

OR "Who is the GOD of GODs?"

### 3.1 WHO IS GOD?

According to me the cosmic energy is the god of the whole Multiverse which controls and balances the whole sophisticated mechanism of the working of the universes.

In my HINDU culture, I have learned that the three gods Lord Bisnu, Lord Maheswar and Lord Brahma are created from "Shakti". If you go and Google Shakti you will find out that it is some sort of energy. This energy is the same cosmic energy and the GODs which we worship are created from this Energy in their Universe. They are created by the cosmic energy and they too accepted that. There are many ancient carvings on historical sites in INDIA showing the creation of these three GODs.

In many cultures and religions you will find the same.

### 4. TRACES OF ALIENS, ALIEN TECHNOLOGY AND ALIEN HYBRIDS.

The GODs which we worship may be the organisms of another Universe having more developed technology than ours.

The weapons they used and the power they possessed are some sort of technology which is highly advanced than ours.

Let us take the example of a famous mythological weapon "The sudarshan Chakra". Everybody knows that it was a weapon used by Lord Bisnu which operates only on his little finger. Most Indians know that the sudarshan Chakra rotates on his little finger but if we go and see the carvings we can clearly see there is some sort of launcher attached to it. So it is thus proved that was some kind of Technology. At that time the human civilization was not much advanced we were like animals but we are more intelligent than them. So these GODs shared their knowledge and technology with us because they thought by improving the human civilization they can get a chance of living mutually with our world.

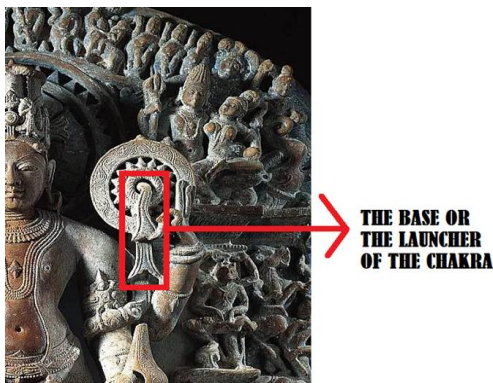

Fig 1: This carving shows Lord Bisnu holding the "Sudarshan Chakra" i.e. the mythological weapon having a launcher type mechanism.

There are traces of ancient technology everywhere in the world. These technologies are alien technologies which are shared to us by them because at that time we were not a potential threat to them. They were from a more powerful and advanced civilization than us.

They also created hybrids among us but we know them as the son and daughter of Gods. Those son and daughters are known by the name of AVATAR's in INDIA and in other countries they are Demigods. They possessed the same power and potential of their parents but were more human. And they lived within us. This proves that they are genetically quite same like us but having some their own unique characteristics.

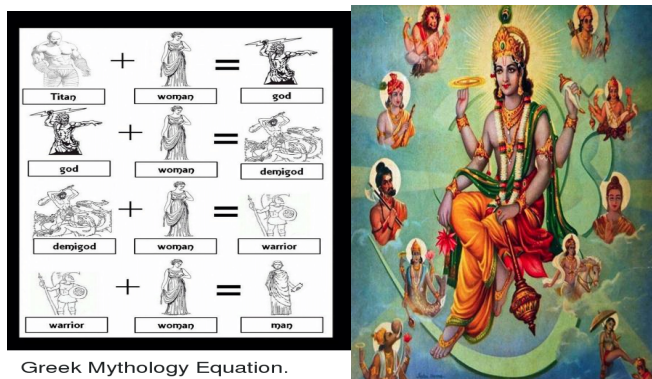

Fig 2: The above image illustrates the Demigods in greek mythology on the left and the avatar in hindu mythology in the right. In this you can see that they are offsprings of the god having powers and skills like them but have a human mother. This proves the hybridisation of aliens and humans at that time.

In INDIA, there is a state Odisha having a famous Jagannath temple which is full of unsolved mysteries. Inside the temple there is a chamber containing Lord Krishna's Heart. Is it really Krishna's Heart or some kind of advanced technology? Once a priest of Jagannath temple was interviewed about this Krishna's Heart who claimed that he had seen it. In his interview he told that the chamber in which the heart is to be

kept needs to be replaced by a new one in a particular period of time. He claims that while transferring the Krishna's Heart they have a rule of going blind folded and wearing gloves and masks. Is this only a religious ceremony or there is something more to be unveiled? The answer lies in the Priest's Interview. He claims that he wanted to see it that's why he went without covering his eyes. When he entered the chamber along with other priests he saw a very bright light coming from the Krishna's Heart and he found that there was some sort silvery metal leaking from it. Also before a long period of time the priests when touched it first time they got a shock like electricity is being released from it. That is why they all made these rules that the Krishna's Heart needs to be transferred from the old chamber to a new chamber in a particular period of time. It is also so much bright that our eyes may go blind and it is so much hot that our hands may get damaged. That is why they decided to take proper precautions while handling the Krishna's Heart. Due to religious beliefs we presently don't have any access to it but it may be some kind of advanced technology.

The more we go deeper into this aspect of universe we see more examples of ancient technology like the great pyramids of EGYPT. The pyramids are one of the biggest structures present in places of the world. It has been proved that these structures were built by humans. But the question is why?-

Before sometime this question was unsolved but now the researchers have proof that these were built for grain storage having a shiny surface made up of limestone. The question here is how they were able to move such big pieces of limestone without any technology. If we believe that they somehow succeeded to move these pieces up in the pyramid but how they managed to polish their surface. Is it possible without any technology to polish the surfaces of the stones with such a fine surface finish? Even with the help of modern technology it is very difficult to polish such big pieces of stone and to fix them on the outer surface of the pyramid. Again what was the need of fixing those lime stones on the surface of the pyramids? These incidents and structures are the proof that the ancient technology was much advanced than ours and it was not only ancient technology but also an alien technology.

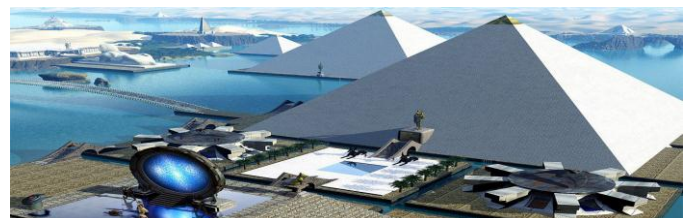

Fig 3: This image is clearly an imaginary concept of ancient egypt and pyramids.

### 5. THE COSMIC ENERGY IS EVERYWHERE

This energy is everywhere in the universe and it can be proven by this simple example. This experiment was conducted by a group of scientists and doctors lead by Dr.

Sam Parnia of the State University of New York and the author of “ERASING DEATH” in order to determine the working mechanism of our brain

In the experiment they used a patient and the most modern technology of determining our brain activity “Plastic Glasses and Ultrasound technology”.

The brain is the most important organ of the living organism which controls all the activities of our body. But how does the brain evolve with its surrounding i.e. how does the brain respond according to its surrounding. The term used to define this is neuroplasticity. And the way to measure this plasticity is by measuring the pressure on the brain tissues.

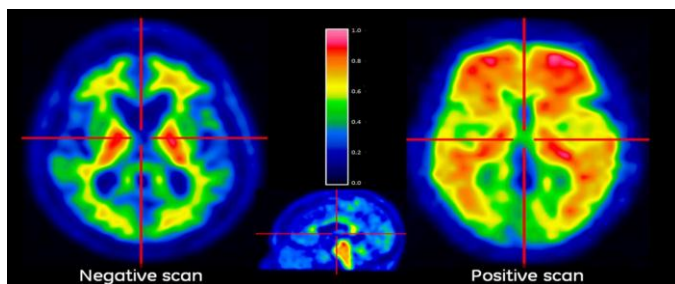

Fig 4: Typical patterns of 18 F-flutemetamol uptake in negative scan (left) and positive scan (right). White matter uptake is similar in both scans, but there is considerably more uptake in gray matter in the positive scan

So in this experiment the subject is equipped with the plastic glasses which use the mechanism of ultrasound to measure the pressure on the brain tissues. At first when the experiment started the subject was laid on the bed and then the doctor told him to raise his right hand. The plastic glasses were continuously taking the pressure readings on the brain tissues. When the patient is asked to raise his right hand the system detects some pressure readings on the right side of the brain at a particular part. Then the scientists artificially apply pressure at that part by holding the person hand and asked him what does he feel? The person says that his hand automatically went up when the pressure was applied at that part. Now the patient hand is set free and same artificial pressure is applied to that part. The team observes that the patients hand went up. The team applied pressure artificially to that part of the brain but in the first case when the person raises his hand who applied pressure to that part of the brain. Some will say that the motor neurons and neuron system controls it. But if I am not wrong and if they are not wrong the whole body of human is controlled by brain but what controls the brain. They say that the conclusion was nothing because the source of the applied pressure is still not determined. But some say that there is a certain kind of energy in humans and the things around us which controls and balances each and everything. In paranormal science this is referred to as “ora”. The ora are nothing but are a form of this cosmic energy which flows through us.

Now imagine current, which is a form of electrical energy flowing through a wire. When the current flows through the wire at every point in the wire the current is present. This means when some sort of energy is flowing through an object it is flowing through its each and every part if there are no obstructions to its flow and if the energy is that stronger. Similarly if we consider cosmic energy it is also a type of energy so if it is flowing through the entire universe then each and every part of the universe is in effect with this energy.

## 6. MEDITATION- THE UNSOLVED SCIENCE

Many religions advise us to meditate in order to achieve the peace of our mind. But do you know how and when the mind achieves certain peace? And most importantly who taught us these things in those times?

We see illustrations of GOD meditating in historical structures. But why do they meditate?

Meditation is the real untold science. In different scripts of ancient times you can find that when a person meditates he/she cannot feel or sense what is happening in the actual world.

Ever imagined why?

The answer to the question is already with us but we just need to look at it in both a scientific and spiritual manner.

Our body works in a very complex way, all the processes in the body are controlled by our brain. The brain continuously works and controls all the processes in our body. What if our brain malfunctions, all the processes in our body will be affected and some processes may stop.

The brain can be imagined like a CPU but much faster and having storage space much more than that. Yes it is true that our brain has much capability than we can imagine. According to scientists our brain has a capacity of storing over 4.7 billion books which is nearly equal to a capacity of 2.5 million gigabytes.

Fig 5: Synapses and Neurons

But we are not aware of the total capacity of our brain. The US Scientists have measured synapses and found this capacity. They confirmed that we humans are not utilizing

our brain to its fullest or we are not able to access our brain true potential.

Meditation is actually a science if we go deeper into it. Some people give it a spiritual way but actually its pure science.

*Fig 6: This image illustrates a person meditating and increasing his energy by withdrawing some cosmic energy of the universe.*

The cosmic energy is abundant in this world. And is present in a very large quantity, we just need to get access to it. The energy can be constructive and destructive in different ways. In order to increase our cosmic energy and interact with it we need to give our brain a little rest, such that our cosmic energy can rest a little and we will be able to access it in its true form. Most ancient manuscripts say that during meditation a person sees a light like structure in darkness and at that time the person is not able to understand what is going around in the world. He is not able to understand because at the time the brain which receives input from the outer world and controls all our senses is inactive. The brain is inactive means the energy is taking rest and not helping in functioning of our brain through the pressure tissue mechanism.

At that time we see the energy in the form of light in a space full of darkness. We see it for some time and then when we open our eyes we feel relaxed. Why we feel relaxed after this? What happens during process?

During this process our energy gets some time to rest meaning also our brain is getting some time for its rest. That is why feel relaxed.

In a survey it is found that from a group of persons, the persons who meditate for some time in any form are more intelligent than the ones who don't. If we want to access the true potential of our brain we need to get access to the cosmic energy.

## 7. ASTROLOGY—PSEUDOSCIENCE OR ADVANCED SCIENCE

Astrology is generally claimed as a pseudo-science which can predict about human affairs and terrestrial events by studying the changes in the positions of celestial objects. It is believed to have its origin around 19<sup>th</sup> to 17<sup>th</sup> Century BCE Mesopotamia from where it spread around the world. Its traces can be found in many cultures like Hindus, Chinese and Maya etc. Horoscopes are also related with astrology which can predict a person's personality and upcoming events in a person's life just by observing the positions of celestial object. It is an untouched part of science which has no proof yet. But is it real? Who taught the people in the ancient times to study the position of celestial objects? And most importantly how did they manage to find the position of the celestial objects without any advanced technology?

*Fig 7: This above picture shows a carving from Panchavarnaswamy temple located in Tamil Nadu, India showing Aries or Ram, Taurus the Bull, Gemini or the twins, Cancer or Crab, Leo the lion and Virgo the virgin going in circle. This temple is at least 2000 years old showing the traces of astrology at that time.*

*Fig 8: This picture shows the carving on the roof of Kalugasalamoorthy temple, Tamil Nadu, India. In the carving you can clearly observe the proof of astrology and ancient astronomy at that time. This temple is nearly 1300 years old.*

Fig 9: This picture shows the Chinese zodiac carvings made on an old Chinese coin.

What if astrology is also related to cosmic energy? Previously it is said that the cosmic energy is the energy binds the universes into one thread. So, if there is any change in the positions of objects in this thread then the whole orientation is affected and there is some sort of change in the cosmic energy. If there is any change in the total cosmic energy then there will be change in the energy of each organism attached to it. So if there is any change in celestial objects position then there will be some sort of change in our life.

CHANGE IN THE POSITION OF CELESTIAL OBJECTS→  
CHANGE IN THE ORIENTATON OF THE WHOLE  
SYSTEM→CHANGE IN THE COSMIC ENERGY→CHANGE IN  
THE ENERGY OF THE ORGANISMS→ CHENGE IN THE LIFE  
AND BEHAVIOUR OF THE ORGANISMS.

Also if we are able to track the position of celestial objects then we may be able to track a person's whole life. This is some kind of advanced science which is not yet proved. But who taught us about this? It may be those organisms from outer world because many illustrations and carvings show this.

## CONCLUSION

The conclusion of all this research and investigation is that cosmic energy is the supreme energy of this universe which controls all the processes and balances this whole system and surrounding. Every organism has its own sort of cosmic energy. Meditation is the only way to increase our energy and to unlock our brains true potential. The proof of the existence of organisms from the outer world and the alien hybrids in ancient time. The proof of the presence of alien technology among us in the ancient time continuing to this modern period of time. The proof that cosmic energy can be related to everything in our past, present and future. The theory which says that Energy cannot be created or destroyed but energy can create and destroy.

*"USE THE PAST TO SOLVE THE PRESENT AND FUTURE"*
